

CSL Feed Front

**More cow comfort due to
wide top opening!**

Care for Cows

Strong construction that offers the cow a safe, quiet and comfortable feeding place

The ultimate in cow comfort feed front solutions, the CSL self-locking feed fronts provides an exceptionally wide top opening and a curved rail that minimizes contact with the cow's head. CSL feed fronts have a 47 cm curved opening across the top and all the standard features offered with all our self-locks.

Our CSL self-locks maximize labour and management efficiency by providing an easy way to lock individuals and large groups. This makes physical examinations, vaccinations, inseminations, pregnancy checks, and treatments that much easier and faster.

Cows can be locked individually with a locking pin

They can also be released individually from behind the cow by means of a telescopic control stick

Characteristics CSL Feed Front

Cow friendly design

Simplicity and functionality

Quiet operation

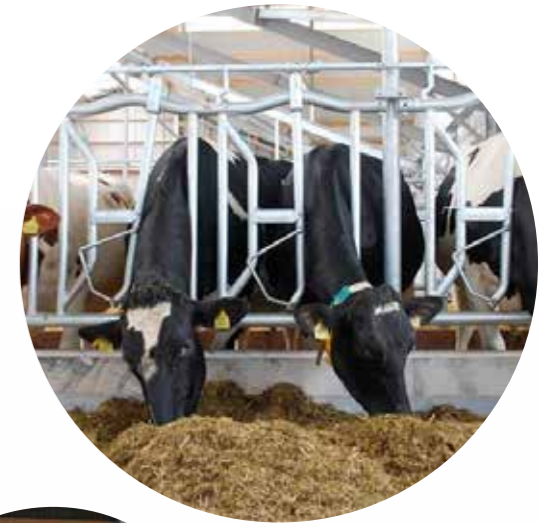

Feeding place widths vary from 65 to 75 cm

Low Maintenance

Our CSL self-locks have minimal moving parts, meaning there is less likelihood of parts breaking down and issues arising

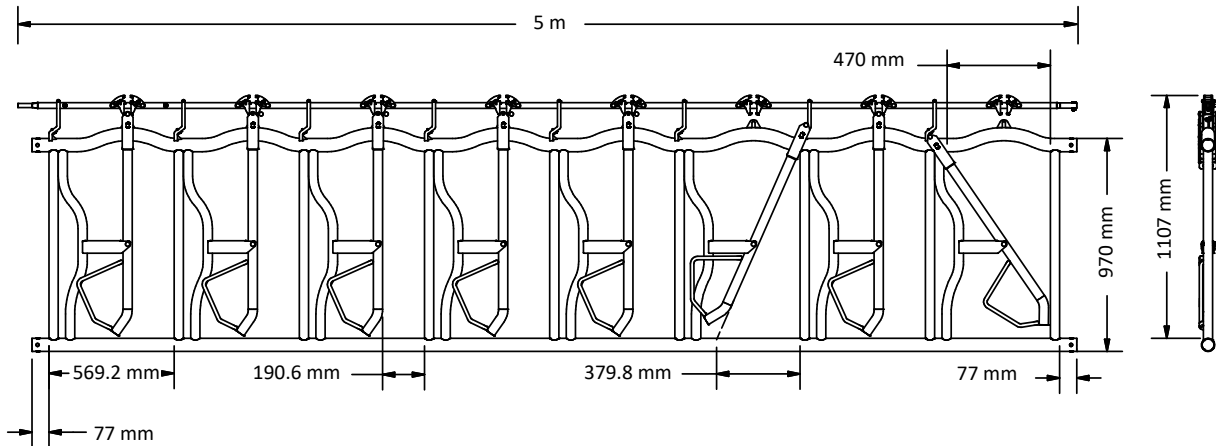

Curved top rail

Large 47 cm head hole opening

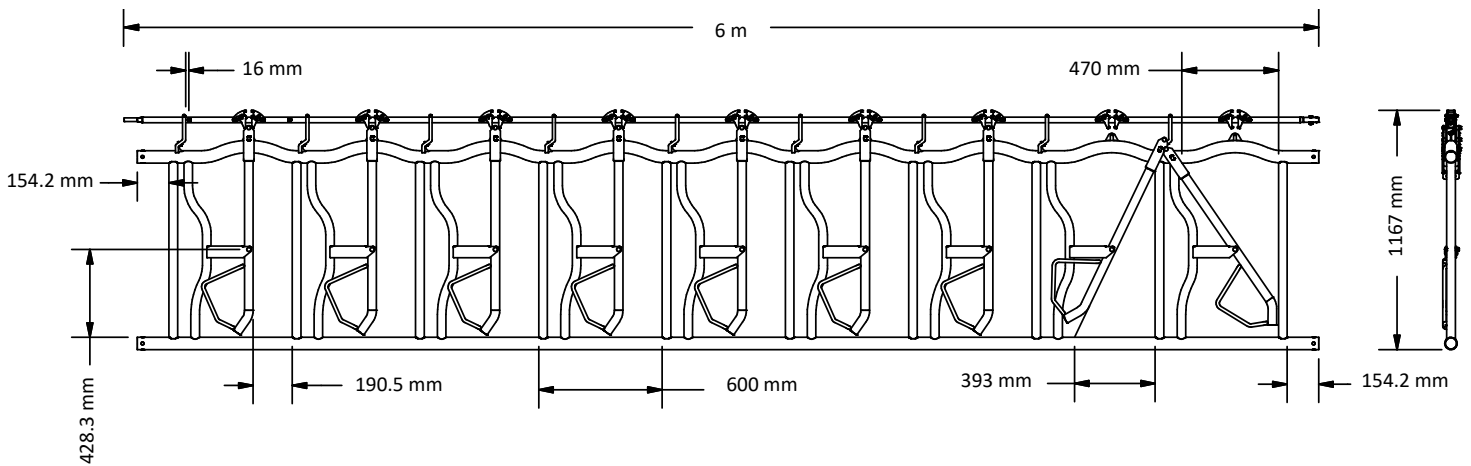

Technical data

8 openings

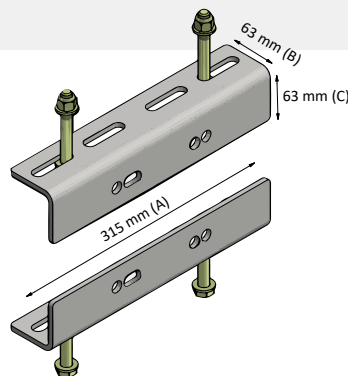

9 openings
